## **“Fire Alarm - Fundamentals for Designers & Estimators” Registration Form**

Getz Fire Equipment Co. is now offering Fire Alarm System training that is specifically curated to meet the needs of your design and sales estimating professionals. Whether they are just getting started in the industry, or are seasoned veterans needing updates and a refresher, there’s something for everyone.

### **(3-Day Instructor-Led Training – Peoria, IL.)**

**\$1,680 Registration Fee (Includes Copies of NFPA 72 (2022), IBC (2021), & Daily Lunch)  
 (Prerequisite: Successful Completion of a Basic Low-Voltage Electronics Quiz)**

While this training was developed with newer fire alarm design and estimating professionals in mind, it is updated to reflect some of the changes and requirements of the latest codes & standards, making it relevant for re-educating your more seasoned personnel as well. It will provide a good understanding of what dictates the need for a fire alarm system, functionality & fundamentals, and the application of various codes & standards that play a role in a properly designed and executed system installation. Students will learn about conventional, addressable, and analog addressable control concepts, primary & secondary power requirements, NEC & NFPA 72 circuitry and pathway requirements, initiating, notification, and control function components and functionality, submittal and contract documents, concepts such as smoke stratification, drift compensation, alarm verification, and application profiles. Code references will help those preparing for NICET certification, and we will provide tips and tricks to assist in successful completion of those exams.

As we expand our training, we will be conducting exercises that will be useful to estimators & designers alike. Students will be asked to layout requirements for a mixed-use occupancy based on designated building and life safety code compliance, to execute battery & voltage drop calculations, and to understand the need for potential risk analysis scenarios. Lastly, we will discuss the requirements to completely and accurately execute system estimates, contracts, submittals, & closeout documentation.

**2025 Dates Available** (Max. Class Size is 12 Students – Registration & Fees Required 2 eeks in Adv. of Class)

Select Preferred Dates:  Mar. 4-6, 2025  Jun. 3-5, 2025  Sept. 9-11, 2025  Dec. 9-11, 2025

*Our training courses are in no way intended to replace any specific manufacturer's training. The concepts conveyed are common to the industry. We will therefore not be spending time on any specific brand of equipment, other than perhaps for the purpose of completing the exercises outlined in the course.*

*Travel, accommodation, and meals outside of those specified above will be your responsibility. Upon registration we will provide you with additional information regarding travel & accommodation, class times, etc..*
